TITLE OF INVENTION: No. 6635739-Mammalian GRRH Analogs and Uses Thereof in Regulation
TITLE OF INVENTION: Pregnancy
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      mmalian GnRH Analogs and Uses Thereof in Regulation
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             PEATURE:
NAMB/KEY: mat peptide
LOCATION: Within brain mRNA 121-150, within brain gene 2174-2203.
LOCATION: Within brain mRNA 121-150, within brain gene 2174-2203.
OCTHER INFORMATION: MOD_RES substitution of Gly residue at 10 by -aza-Gly-NH2.
OCTHER INFORMATION: Xaa_represents D-Arg.MOD_RES Glu at position 1 is
OTHER INFORMATION: pyroglutamic acid.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ô

Facett No. US20020065226A1

GENERAL INFORMATION:

TELE TELET-Khodr, Theresa M.

TITLE OF INVENTION: No. US20020065226A1-Mammalian GnRH Analogs and Uses Thereof in ReTLE REFERENCE: P7345.2 (CIP)

CURRENT FILING DATE: 2001-08-28

PRIOR APPLICATION NUMBER: US/09/941,094A

CURRENT FILING DATE: 1999-10-15

NUMBER OF SEQ ID NOS: 4

SEQ ID NOS: 4
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     NAME/KEY: mat peptide
LOCATION: Within brain mRNA 121-150, within brain gene 2174-2203.
OTHER INFORMATION: MOD RES substitution of Gly residue at 10 by aza-Gly-NH2. Xaa re
OTHER INFORMATION: D-Arg. MOD RES Glu at position 1 is pyroglutamic acid.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 144. Application US/10360101
Sequence 144. Application WS/10360101
GENERAL INFORMATION:
APPLICANT: Melhouts, Cornelis J.
APPLICANT: Lechhouts, Cornelis J.
TITLE OF INVENTION: Export and medification of (poly) peptide in the lantibiotic way
TITLE OF INVENTION NUMBER: US/10/360,101
CURRENT APPLICATION NUMBER: EP 02077060.8
PRIOR APPLICATION NUMBER: EP 02077060.8
NUMBER OF SEQ ID NOS: 309
NUMBER OF SEQ ID NOS: 309
SEQ ID NO 144

                                                                                                                                                                                                                                                                                                                                         FEATURE:
NAME/KEY: mat_peptide
LOCATION: unknown
COTHER INFORMATION: MOD_RES substitution of Gly residue at 10 with aza-Gly-NH2.
CTHER INFORMATION: D-Arg. MOD_RES Glu at position 1 is pyroglutamic acid.

GRNERAL INFORMATION:
APPLICANT: Mol. Gert N.
APPLICANT: Leenhouts, Cornells J.
TITLE OF INVENTION: Export and modification of (poly)peptide in the lantibiotic way;
FILE REFERENCE: 2183-5673
CURRENT APPLICATION NUMBER: US/10/360,101
CURRENT FILING DATE: 2003-02-07
PRIOR PILING DATE: 2003-06-24
NUMBER OF SEQ ID NOS: 309
SOFTWARE: Patentin version 3.1
